

Object

```
graph TD; OR[Object Reference] --> O[Object]; WR[WeakReference] --> O;
```

The diagram illustrates the relationship between an Object and a WeakReference. At the top, a light gray box labeled "Object" is connected by a vertical line to a larger box below it. This larger box is divided into three horizontal sections. The top section is a light gray header labeled "WeakReference". The middle section is labeled "new" and the bottom section is labeled "value". A vertical line from the "Object" box connects to the boundary between the "WeakReference" header and the "new" section.
